

Blend your courses with online elements

Readings / Presentations, etc.

Uploading files will be easier than ever with Drag and Drop- [Video](#)

-  Ability to select and upload **multiple documents** as a zip file
-  Literally 1 click is necessary to upload as many files as you want
-  **Secure** and easy to reach platform

Examples:

-  Upload **presentations, handouts, reading lists**
-  You can even share your images and **videos**
-  All in an **organized** form

Much more than a Reading /File Storage

-  **Central place** for gathering all the information about your courses
-  Online activities **supplementing** or substituting **offline work**
-  Students can always check deadlines and what is required from them (**calendar**)
-  Communication without using other computer tools (news, chat)
-  Available **from any location at any time**
-  Monitored activities and easily adjustable
-  Get immediate feedback from your students
-  Easy to **archive** and to **reuse** it
-  Easy scheduling, teamwork, anonym functions

It collects assignments for you - [Details](#)

-  Text or files
-  You can grade / mark and comment them online and students receive an immediate feedback.
-  Plagiarism check available (Turnitin support)
-  You can export the grades to be used in Infosys.

It creates and corrects quizzes for you – [Case study](#)

-  Types: Multiple Choice, True/False, Short Answer
-  Random questions, swap possible answers
-  All students will get different questions
-  Give hints, final points
-  You can see all the results at a single place

Examples

-  Self revision for students after lessons
-  Practice
-  Swap an offline test with an online one

A space for collaborative activities and group work

-  *Glossary* to create **shared understanding of concepts**
-  *Forums* to **exchange ideas and have discussions**
-  *Wikis* to **create content together**
-  *Database* to **collectively gather resources**

Trainings and Continuous Tutoring available
